

Annual Index

Following is the comprehensive index for volume 155 of the *Journal*, which covers all material from January 1998 through December 1998. Two-letter abbreviations are used for months. The complete citation for each article in the Author Index is listed under the name of the first author. Coauthors are listed alphabetically with a cross-reference to the first author; cross-references containing multiple first author names separated by semicolons indicate multiple articles by the coauthor. Book reviews appear in the Author Index under the name of the reviewer and in the Subject Index under the heading Books Reviewed; the books reviewed are arranged alphabetically by the surname of the book's first author or editor. In addition to being indexed by author name, letters to the Editor regarding articles published in 1998 are indicated in parentheses after the citations for those articles.

Each entry in the Subject Index is identified by the surname of the first author only; semicolons between names of authors of letters to the Editor indicate multiple letters. Entries other than Special Articles, Regular Articles, Commentaries, and Brief Reports are given the following designations: editorial (editorial), Images in Neuroscience (image, neuro), Images in Psychiatry (image, psych), Clinical Case Conference (case conf), book review (bk rev), letter to the Editor (letter), Official Actions (off acts), supplement (suppl), and Festschrift (festschrift). Corrections are cited with the articles to which they refer and under the heading Corrections in the Subject Index.
